The Hiring Manager

Triangle Internet Service Ltd
Dhaka, Bangladesh

Subject: Application for NOC Engineer – Triangle Internet Service Ltd

Dear Hiring Manager,

I am writing to express my keen interest in the NOC Engineer position at Triangle Internet Service Ltd. As an aspiring network engineer currently pursuing a B.Sc. in Computer Science & Engineering at World University of Bangladesh — backed by a Diploma in Computer Science & Technology from Dhaka Polytechnic Institute and cybersecurity training from Creative IT Institute — I am eager to bring my networking knowledge, Linux system skills, and hands-on technical experience to your NOC team.

My focus is firmly on network engineering. I have been following a structured CCNA-track self-study curriculum covering TCP/IP, subnetting, OSI model, routing and switching fundamentals, and network troubleshooting using tools like Wireshark. I understand the importance of network uptime in an ISP environment — ensuring zero packet loss, fast fault detection, and rapid incident response are the exact challenges I am motivated to take on. My background in hardware troubleshooting and first-level LAN/WAN support has given me practical, real-world experience in diagnosing connectivity issues and resolving them under pressure.

Beyond core networking, I work daily in a Linux environment (Ubuntu) and am comfortable navigating the command line, managing system configurations, monitoring services, and writing Bash scripts for automation. I also have working knowledge of Python, which I use to build tools and automate repetitive tasks — a skill that directly supports NOC work such as log parsing, alert handling, and network monitoring scripts. My experience with Git, SSH, and CI/CD pipelines further demonstrates my comfort with the technical infrastructure that modern NOC teams rely on.

Triangle Internet Service Ltd is a name I respect in Bangladesh's ISP landscape. I am confident that joining your NOC team would give me the right environment to grow into a skilled network operations professional while contributing meaningfully from day one. I am a fast learner, self-directed, and committed — qualities reflected in my ongoing CCNA preparation and 16-week structured study plan covering networking, Python, and systems.

I would welcome the opportunity to discuss how my skills and dedication align with your team's needs. Please find my CV attached. I am available at your convenience for an interview.

Thank you for your time and consideration.

Sincerely,

Md Shagor
